Analyzing and Visualizing WeRateDogs

First, WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators however are almost always greater than 10 (11/10, 12/10, 13/10, etc.). In theory the rates should be 1 to 10. However, WeRateDogs disagree, they admit almost all dogs deserve a 10 and sometimes more than that. WeRateDogs has over 6 million followers and has received international media coverage. One of those coverage were about the quote “they’re good dogs Brent”, this was an exchange in which WeRateDogs shut down a person having an issue with its rating system in humorous ways. So **Which dog type (breed) is most common dog in the tweet dataset? What dog type has the highest average rating?** These questions and more are answered in the following insights:

Insight1: Most common dog type

-The Golden retriever dogs are the most common dogs in this dataset.

Insight2: Lowest average rating among dog types

-The Japanese_spaniel dog has the lowest average rating ,Clumber dog has the highest average rating.

Insigh3: Average Rating of Dog Type by Number of Ratings of a Dog Type
