Analyzing and Visualizing WeRateDogs

I asked three about data set and answered it in the following insights:

Insight one

Q.what is the relation between Favorites and Retweets?

I draw a scatter plot between   Favorites and Retweets ,I found that retweets is high correlated with favorites .

Insight Two

Q.what is the most favourite dog in this dataset ?

I found that Golden retriever is the most favourite dog in this dataset

Insight Three

Q. what kind of dog stages has the highest rating?

I found that Pupper has the highest rating by 26.0

Conclusion

The Twitter account WeRateDogs (@dog_rates) is devoted to humorously reviewing pictures of dogs doing adorable poses. Dogs are rated on a scale of one to ten, but are invariably given ratings in excess of the maximum, such as "16/10". It has acquired over 4.5 million followers.

If you are thinking of adopting a dog, get a floof(er) - far away from being pupper at least still in the stage of puppo yet not a doggo to live more togother
